

## Hi! My name is Susan and this is my family's home.

It's spring and that means it's time again for seasonal cleaning, makeovers and home renovations. This year, **Elmer's Glue-All** will again be our DIY hero as we create easy-to-make projects for each room of the home.

Join me as I show you how we created five items — from a wine rack in the kitchen to a shoe organizer in the bedroom — that are perfect for sprucing up or organizing your own home. With Elmer's Glue-All at the ready, I'll help you create a stylish and original space you'll love to come home to. Welcome!

Homemade Wine Rack – Elmer's Glue-All

## Gettin' Organized.

Here we see the homemade wine rack I built a couple days ago using Elmer's Glue-All. My husband loves good wine with dinner, so I wanted to give him a wine rack that not only looks nice, but is functional, too. This one can hold up to seven different wines, but depending on the size of your space, your wine rack could hold more.

Click here for [step-by-step instructions](#) and a ["how to" video](#) for a demonstration on how you can create your very own wine rack!

And here's our entryway with our cool, new decorative art piece.

## From stale to stylish.

We're always looking for new ways to add some style to the house, particularly high traffic areas like the entryway. So, to spruce things up a bit, I created this stylish piece of decorative art last weekend using Elmer's Glue-All and Foam Board.

See how she did it, and how you can too, with these [step-by-step instructions](#) and a ["how to" video!](#)

## Decoupage Table – Elmer's Glue-All

### Crafty, cool and functional.

Next up is the new Decoupage Table my son David created for our living room. It's complete with decorative paper shapes and images and a lamp and journal to match. After a quick overnight dry, it now sits beside the Family couch, complementing our new style for the season.

This new Decoupage Table can call your living room "home," too. Simply Follow the [step-by-step instructions](#) and a ["how to" video](#) for success!

## Burlap Basket – Elmer's Glue-All

### An inexpensive, practical solution.

Here in the office, my husband's pens and pencils used to be all over the place. To help organize things, he created a new Burlap Basket for all his writing utensils. Made using Elmer's Glue-All and a few everyday supplies around the house, the burlap basket will help keep his writing utensils organized and ready to be used when needed.

When you have as many pens as we do, a Burlap Basket might be what you need. These [step-by-step instructions](#) and a ["how to" video](#) walk you through creating your own!

Shoe Organizer – Elmer's Glue-All

## We love organization.

I absolutely love shoes and just had to build this shoe rack for our guest bedroom. The shoe organizer, made using Elmer's Glue-All, is perfect for holding shoes of all sizes.

Take a peek at these [step-by-step instructions](#) and a [“how to” video](#) to make your own closet organizer!
